

Task #	Task Description	Date Opened	Reported By	Pri	Assigned To	Notes	Estimate (hrs)
To be Assigned or Discussed							
4143	Just a note that Haje will contact you when ready to start working on the Tsyganenko code for Solaris. I hope that will be within the next 3 months, in order to match the time of this software release. Please assist Haje with access to Solaris machines or provide test information as necessary.	10/8/2010	Vassilis	?	Pat		
4144	when Clarina was answering another question from me, she mentioned that there is an account called thuser -- "THEMIS group account". I have absolutely no recollection of this account being used or created, and there are just a few files in the Desktop/ subdirectory.	10/8/2010	Bryce	0	Team		
4147	Slices re-gridding: Change interpolation method to nearest neighbor	10/8/2010	Vassilis	?	Aaron		2 hrs
4148	Slices re-gridding: Add nearest neighbor interpolation across energy, based off bin size, & implement in gui	10/8/2010	Vassilis	?	Aaron		4-6 hrs
4149	Allow exporting of slices plots to .eps format. There should already be some code in place to do this; if not we may want to re-prioritize it.	10/8/2010	Vassilis	?	Aaron		
4150	Allow slices based off coordinates other than DSL.	10/8/2010	Vassilis	?	Aaron

4078	help request Martin - SST	6/18/2010	Martin Birch	0	Davin		
Harald							
	ASI software - running fine as of 25 May 2010, L1's and mosaics are up-to date.				Harald		
	Thumbnail Data: - cdf files done until April 30, 2010 - overview plots done until April 30, 2010 - movies done until April 30, 2010				Harald	Updates ready 7-10th of the next month	
	Full-resolution raw data: - complete for 2007, 2008, 2009 - reasonably complete until mid February 2010				Harald		
	Full resolution data: - data cdf done for all 2007 and 2008 and mid Nov-2009 - keogram cdf done for 2007 and 2008 and until mid Nov-2009				Harald		
	Web site mosaics and movies: - Mosaics and movies reprocessed for 2007/2008 and 2008/2009 seasons - Mosaics and movies up to date until April 30, 2010						
	Web site overview plots with full resolution data: - overview plots done for 2007 and 2008 and until mid-November 2009 - overview plots with thumbnails done until April 30, 2010						
2069d	UCLA -- mirror site set-up		Vassilis	1	Harald	UCB has 2-1TB and 2-2TB bricks.	
Hannes							
4080	Attitude Determination next few months	6/21/2010	Hannes	1	Hannes	will send out new attitude corrections for tha, thd and the. 8/30/2010: Thb and thc while in lunar orbit based upon sun angles. Work with UCB Ops folks (Dan Cosgrove).	
4034b	Ferdinand sent was an attempt on his part to automate the shadow processing. He wanted feedback whether the products produced are adequate and if the code is amenable to automation. We can pick it up with him once you have gone through it.	4/14/2010	Vassilis	?	Hannes	Report sent out on 9/13/10. Jim L to review	
4018a	New Calibration FGM parameters and spin axis offsets	5/10/2010	Hannes	1	Hannes	in progress	
4058	This is getting a bit out of hand I think. How about a configuration file? The software just reads keywords from a configuration file. With such a configuration file it is possible to set keywords automatically (for the scientists) but additionally it would give us the possibility to keep track of what the software does automatically. When I do calibrations I can then save the configuration file together with the results and not worry about the things that the software might have done automatically.	5/10/2010	Hannes	3	Hannes	Hannes sent out new version for review.	
2074c	quality flag for FGM data		Vassilis	3	Hannes	on hold	
2082a	Spin modeling during shadows BugZid=43		Vassilis	3	Hannes	Jim L to write routine. Hannes send info.	
Aaron							
2013	2-D Slices		Vassilis	1	Aaron		
2013x	User's Guide write-up and then review with Xuzhi		David	1	Aaron	changes in progress	
2013am	Crib		David	1	Aaron	changes in progress	
4145	I added the interpolation option you described to the command line calc routine. You can now use the interpolate='tvname' keyword to interpolate data to match 'tvname' when using calc on the command line. Add option to GUI	10/8/2010	Vassilis	1	Aaron		

4146	verify the location of the sun-contaminated bins for each spacecraft and any change in location over time(they should change very slowly if at all). They would then re-activate the sun contamination masking. It was previously disabled because the masking was originally in the from place. Davin said that he wants to create the new configuration files that would be uploaded to the spacecraft.	10/8/2010	Vassilis and Davin	1	Aaron		4 hrs
3001	I'm getting a crash in the calculate window after I delete the text in the program area and then click on a data quantity from the tree. The error message is below.	12/7/2009	Aaron	1	Aaron		
3015	The data processing panel doesn't allow split components. This is fine for some operations, even required, but for some operations this doesn't make sense. For example, clipping. There is a good chance that some people will want to clip each component at separate values.	12/11/2009	Pat	1	Aaron	analysis only - in progress	
3079	110. GUI -- spinner widget, inconsistencies between actual and displayed value for very small numbers	2/12/2010	Pat	2	Aaron	Support exponential notation for very small values	
3079a	Spinner Part	2/12/2010	Pat	2	Aaron		
3079b	FormatAnnotation Part	2/12/2010	Pat	2	Aaron	The format routine is incorrectly deciding the # of significant digits in a number when using decimal format. I think this may have been done originally for simplicity but it should be fixed	4-5 hrs
3083	137. GUI spinner controls -- when inputing value >= 2^16/2 in grid thickness spinner, causes error message and value reset to -32768. Pat: Problem is not the spinner. Object definitions using short ints when long ints should have been used.	2/16/2010	Pat	2	Aaron	Probably short data type used where long required, affects many of the spinner controls	6-10 hrs
2027e	Finishing the coordinate transformation of the thm_load_state data at input, to include transformation of spinaxis attitude, need to determine keyword switch, implement the rotation of the spinaxis elevation/azimuth from gei to arbitrary coordinates (consult with Pat, Vassilis)		Vassilis	2	Aaron	not allow velocity to go bad	1 hr
2013af	Mark one count level (dashed line)		Vassilis	2	Aaron	Vassilis wants to talk to Jim Mcfadden about this. Jim McFadden to review email.	
2013s	combine SST and ESA slices into a single plot?		Vassilis	2	Aaron		2 days
2013t	Allow for loading of user-specified distributions in gui. 8/23/10 Per Vassilis: For 2013t instead of allowing user specified distributions in the gui I will be adding an option to compare slices with specified functions		Vassilis	2	Aaron		4-6 hrs
2013w	Integrate our own slicer3.pro gui with regular 2-D slice plots.		Vassilis	2	Aaron		2 days
3014	We don't have support for filled symbols. This means symbols are only outlines.	12/11/2009	Pat	3	Aaron		
3016	There is no way to control the variable font size from the variable panel. There was a barrier to adding features to the variable panel when this came up before, in terms of a design that was too complex to modify reliably. When I fixed some previous bugs in this panel I simplified the code considerably. I now think that adding this feature is feasible.	12/11/2009	Pat	3	Aaron		1 day
3031	GUI Overview plots sometimes have diamond shaped artifacts in the sample rate bar. Should fix.	1/5/2010	Vassilis	3	Aaron	This is a side-effect of the a way that symbols are used as a hack to generate the sample rate bar. Fix after 3014 is fixed.	1/2 day
1579	When importing a variable with a valid 'V' component in its data struct, but no spec flag set in its meta data, the loaded data object fails to load the y-axis. This should be fixed, as it ends up incorrectly loading certain spectral quantities.		Pat	4	Aaron		
2121	When thm_load_fit is called requesting a single data type it will also return some auxiliary data types. For example: thm_load_fit,probe='b',datatype='fgs' returns: 1 thb_fit_code 2 thb_fit_npts 3 thb_fgs. load bug or test script bug) b. The relpathname all keyword is broken.			4	Aaron		
2028	Variable units -- generic solution - thm_load_spin, _state, _hsk, _sst, _esa, _bau, _fgm, _fbk, _fft, _fit, _scm, _efi, _trg, _asi, _gmag, _ask, _mom, _esa_pkt		Vassilis	4	Aaron		
2029	From Hannes		Hannes	4	Aaron		
2029a	Provided is the most common plot used by scientists that look at magnetic		Hannes	4	Aaron		
2029b	The level 2 CDF files at http://themis.ssl.berkeley.edu/data_download.shtml should contain position in various coordinate systems as well. Preferably in the same resolution as the data. Otherwise Scientists need to get the position from another source. Notes from Vassilis: option to introduce the data in RE with keyword (one RE =6,478 kilometers ???). Like thm_load_fgm /pos_units='RE'. Also thm_load_state keyword out_coord 'GSM', 'GSE',...etc.		Hannes	4	Aaron		
2029c	If one loads fgm data from probe 'a' and let's say there are no data for the chosen interval. The variables tha_fgl and tha_fgl_gsm etc. should all be empty. It could be those variables still contain data from the previously loaded interval.		Hannes	4	Aaron		
2030	upgrade thm_load to work with probe assignments		Vassilis	4	Aaron		
2031	move functionality of thm_load_state2 into thm_load_state and delete thm_load_state2		Vassilis	4	Aaron		
2032	Multiple enhancements concerning keywords, valid_names and thm_load routines		Vassilis	4	Aaron		
Cindy							
Jim L							
4142	issue with FGS processing	9/30/2010	Vassilis	0	Jim L	analysis first fixing if needed priority 1 after	

4117	I am a postdoc from UCLA working on the THEMIS data. The recently added FFF data is very helpful in our study with higher frequency resolution and longer time availability. I looked at FFF data and compared with FFP data during particle burst and attached a couple of examples as follows. In the attached figures, top three panels are electric field (1. FFP, 2. FFF, 3. closest FFP data at FFF recording times), and bottom three panels are magnetic field (4. FFP, 5. FFF, 6. closest FFP data at FFF recording times). As we can see from the figures, FFF data generally agrees well with FFP data, but sometimes is associated with a short time shift (e.g., -10-05-12/12:51:54 UT). When closed a warning needs to be sent to users.	8/16/2010	Wen Li	0	Jim L	I've had a chance to take a closer look at the FFF (apid 44f) vs. FFP (apid 44d) timing discrepancy you pointed out. I have a tool that tries to match the FFF samples bin-by-bin with the FFP samples, to locate the data points that are common to the two data sets, report the matching indices, and show any time differences found for the matching samples. Please refer to the attached output file fff_ffp_comparison.txt. It seems that the IDPU is occasionally skipping over some of the FFP samples, and not copying them into the FFF data stream 8/30/2010 Jim L to send out an email (high priority) to get a etu/flatsat case setup. Awaiting "function generator" and Peter's return from vacation. 9/13/10 see Peter Berg for a piece of equipment. 9/20/10 Jim L to run on etu the old code and see if the problem can be duplicated. flatsat will not be available for 1-2 more weeks. 9/30/2010 going to test on Flatsat the week of 10/4-10/8. Prep for test and contact tom Clemons for support to hook up function generator. Next step: patch to probe	
4140	decompression algorithm - implementation and testing; FYI, I'm done (pending ETU testing) implementing the new lossy moment compression algorithm requested by Vassilis. It passes its self-consistency check (that the decompression algorithm exactly reverses the compression algorithm). We still have to test it against Peter's implementation on the ETU, to make sure the ground decompression is compatible with the FSW compression. He's probably not quite finished with the FSW side of it yet, so as soon as he's ready we'll give it a try on the ETU.	9/15/2010	Vassilis	0	Jim L	flight software patch to remove the SST data from the moments packets for the ARTEMIS probes. Peter is going to implement the FSW side as a new compression algorithm, so I need to add support for it in the VC->L0 processing. Jim's code done awaiting for Peter's FSW patch and then will be run on the etu; 10/8 next step to test on flatsat	8 hrs
4034a	Ferdinand sent was an attempt on his part to automate the shadow processing. He wanted feedback whether the products produced are adequate and if the code is amenable to automation. We can pick it up with him once you have gone through it.	4/14/2010	Vassilis	1	Jim L	Jim L to review Hannes's report.	
4030	cross-check SST psir6 and psif data types for excess counts in psir6	4/8/2010	Jim McFadden	1	Jim L	Talk to Davin as well.	
4030a	Review Onboard Scripts for possible error.	5/17/2010	Jim Lewis	1	Jim McFadden, Davin, Robert Abiad	can duplicate on flatsat. Jim Mcfadden to review Jim L's email.	
4030b	Correct Existing Data	5/17/2010	Jim McFadden	1	Jim L	4030a prerequisite	
4030c	If scripts change - make changes to processing scripts	5/17/2010	Jim Lewis	1	Jim L	4030a prerequisite	
4027b	Reprocessing GOES Data	4/5/2010	Tami - SPDF	1	Jim L	Reprocessing on hold until Howard Singer delivers another batch of binary GOES data files.	
4070	"Add support to thm_cotrans, ssl2gse, and ssl2dsl for /pseudo_dsl keyword. If keyword is present, look for and apply eclipse delta_phi corrections as appropriate."	6/1/2010	Jim L	1	Jim L	thm_load_fit and thm_load_mom, add keyword. In progress - Will review code Davin checked-in concerning tensor quantities in thm_load_mom.	
2266	Timing of Spin Fit data	10/16/2009	Jim McFadden	1	Jim L		
2149g	write a routine to check time tag monotonicity and repair tplot variable if necessary (with options for "replace with NaN" and "delete")		Jim L	1	Jim L	Create a routine to clean up tplot variables. Use in the load routines were susceptible. Recommend that we just remove what is needed to make the time tags monotonic, and issue a warning indicating that the user should consult the THEMIS software team about that data.	
2149h	integrate time tag fixer-upper with TDAS load routines		Jim L	1	Jim L		
4008a	He requested some extra datetime formats. A. Numerical month & time (ie 2007-03-23/00:00:00). this option isn't listed.	3/12/2010	Pat from a scientist (Martin Connors?)	1	Jim L		4 hrs
4008b	He said there is an ANSI standard to separate date & time using a capital T and requested the option to put datetimes in this format. (ie '2007-03-23T00:00:00')	3/12/2010	Pat from a scientist (Martin Connors?)	1	Jim L		
4016	Our "save data as" menu doesn't remember the previous directory > that the user saved to. It could and it should.	3/12/2010	Pat from a scientist (Martin Connors?)	1	Jim L		1 day
2248	once in a while (maybe 10-20 occurrences per probe during the entire mission), the FGM range doesn't change on all three axes at once:	9/10/2009	Jim L	2	Jim L		2 hrs
4135	Now that the L1 ESA/SST/MOM reprocessing is underway, these CDFs will soon contain the full ESA and SST configuration words, in addition to the solar wind flags, sweep modes, and so forth. With the full configuration data available, if someone wants to use a property of these instrument configurations that's not already present as a L1 variable, we don't need to reprocess L1 to add it -- we just write a little more code for TDAS, to extract the new attribute from the configuration data that's already present.						2-4 hrs
4135a	Write some TDAS routines that take an apid and a configuration word, and return a structure with all the relevant properties of that configuration. This is basically reimplementing some logic that's already in the L0->L1 processing code (written in C). If anyone ever needs other attributes of the instrument configuration (for example: the angle maps corresponding to each configuration), we would update these routines to return the additional information.	9/10/2010	Jim L	2	Jim L		

4135b	In the load and/or calibration routines for ESA, SST, MOM: rather than using the ESA solar wind flags and sweep mode from the L1 CDFs, use the ESA full configuration instead (which is present in all three L1 types, for convenience), and use the routines from 4135a to extract the solar wind flags, sweep mode, and any other useful attributes. I think SST does not have any configuration flags similar to the ESA quantities (there's the attenuator status, but that's separate from the instrument configuration word), but it needs them in the future, they should be handled the same way as ESA (extract from SST configuration word instead of adding L1 variables). I can do this, but if the routines from part (a) are well-documented, any of us could probably do this part.	9/10/2010	Jim L	2	Jim L or tbd		
4022	Update L1 master cdfs to support SPDF hosting	3/25/2010	David	3+	Jim L		
3093	Automate processing of eclipse sunpulse data from FGM team	2/22/2010	Jim L	3+	Jim L		
4040	Spinfits - separate E&B timestamps?	4/15/2010	Jim L	3	Jim L	SPDF has issue creating plots on the L1 data with their software	
4046	either thm_load_fit or the GUI code that calls thm_load_fit should split the data into separate tplot variables for E and B, before importing them into the GUI data model. I think thm_load_fit already does something like this. See task 4040	4/23/2010	Pat	3	Jim L	Jim M 4/23: thm_load_fit also splits into efit and bfit variables, so unless you need to look at raw bytes, the 'fit' datatype is not needed. Pat: Agreed. Short term, excluding the data type from the GUI seems like an easy solution.	
2082a	Spin modeling during shadows BugZid=43		Vassilis	3	Hannes	Jim L to write routine. Hannes send info.	
2035	Split L1 ESA (using Thomas's routine) in master ESA data cdf		Vassilis	3	Jim L	On Hold - awaiting Jim McFadden release: Then send David Sub Task List; Calibration variables removed from L1 data master CDF. (Side note: found and reported a bug in SKTEditor, which the Goddard team has agreed to fix...) Waiting for feedback from Jim McFadden about	
2036	GOES 10-12 Test data: h. update labels (Howard's request - minor tweak)		Vassilis	3	Jim L	determine if to be reassigned	3-4 days
2038	STATE Web Page (s)		Vassilis	3	Jim L	review web pages	
2039	bad timing sun pulse times (early January 2009)		Vassilis	3	Jim L	Clarification needed	
2040	L1 Data Processing History Info: SCM, EFI, STATE		Vassilis	3	Jim L		
2043	Refactor repeated CDF library code in CDF processing tools BugZid=50		Vassilis	3	Jim L		
2046	Create a more efficient & productive prototype QA Instrument Command Line Script - first template (s) functional blocks then scripts for FGM, ASK, SCM, FIT, MOM, ASI, EFI, FFT, FBK, Gmag, State, SST, ESA		Vassilis	3	Jim L	In progress. Several templates created, selecting the appropriate command line routines to test.	
2047	Separate E and B timestamps for spin fits: a) make a revised V02 master CDF with E and B separated b) change thm_load_fit to support V01 and V02 of the L1 CDFs c) change the L0->L1 processing code d) change the L1->L2 processing code e) test the changes, then reprocess to create the V02 CDFs (keeping the V01 files around for a while to ease the transition) BugZid=45		Vassilis	3	Jim L	Discuss with SPDF whether having one variable with multiple data sources is difficult for them	
2047a	FGS sample times and values, showing repeated timestamps. BugZid=111 (BugZid=67 must be done first)		Vassilis	3	Jim L		
2047b	Repeated timestamps and gaps in spin fit data BugZid=113 (#67 may fix this one as well).		Vassilis	3	Jim L		
2077	Non Monotonic timestamps. BugZid=72		Vassilis	3	Jim L		
2078	bau_sunpulse_met assumes x86 endiannes (BugZid=13)		Vassilis	3	Jim L		
2047	task 2047 in my name: "Seperate E and B timestamps for spin fits", which is also a change to the L1 FIT master CDF and associated TDAS code. But unlike the spacecraft potential enhancement (which only adds new CDF variables, and is more-or-less backward compatible), 2047 would require us to bump the L1 FIT CDF version number to V02, and produce both V01 and V02 for a while, so users of TDAS 5.20 and earlier will still be able to load L1 FIT data. So I'm not sure whether the spacecraft potential task should include 2047, or not.	3/2/2010	Jim L	4+	Jim L		
4075	describe the FBK data type, time tag specified to correspond to the beginning of the time interval of the data that went into the FBK data, the middle, or the end, or is that unspecified, and what's happening here is that the time tagging is being changed in year 3+ of the mission - in the L1 file definition document, at least, does not define the time-tagging conventions to this level of detail.	6/11/2010	John Bonnell	4	Jim L		
4023	Before EOM reprocess L1 cdf's due to master cdf changes for SPDF	3/25/2010	David	4	Jim L		
2080	Phantom packets" cause non-monotonic distribution times. BugZid=25, low priority.		Vassilis	4	Jim L		
2081	Evaluate CDF compression algorithms BugZid=81		Vassilis	4	Jim L		
2083	Add "last processed" time to L1 (and L2?) CDFs BugZid=115		Vassilis	4	Jim L		
2084	. transforming one data point from SM coordinates to GSM coordinates. ct=time_double('2008-02-16/04:50:00') dipole=[[0],[0],[1]] v=[1,2,3] store_data,'dipole_sm',data={x:ct,y:dipole,v:v} cotrans,'dipole_sm','dipole_gsm',/SM2GSM cotrans,'dipole_gsm','dipole_gse',/GSM2GSE get_data,'dipole_gse',data=dipole_gse xdipegse=dipole_gse.y[0] ydipegse=dipole_gse.y[1] zdipegse=dipole_gse.y[2] tilt=atan(xdipegse,zdipegse) When I check the data for 'dipole_gsm', the values are 0,0,0. I'm not sure what they SHOULD be, but I know that their magnitude should equal 1. sqrt(x^2+y^2+z^2)=1		Christine	4	Jim L		
4097	cdf's with MD5 checksum	7/19/2010	Jim L	4	Jim L	Jim L to send email with subtasks and estimates	
Jim M							
2057	SCM CAL File Processing Doc		Vassilis	1	Jim M	5/21/10 Olivier will review - pinged Olivier again on 7/30/10	

4004	Sort out if TDAS software can run off SPDF cdf's	3/5/2010	David	1	Jim M	sent Tami list of Calibration files - Jim M needs to check if zeros directory online	
3099f	Revise the calibration code for the particle data types (ESA, perhaps also SST or MOM?) to look for spacecraft potential in L1 FIT, if the moments are decimated	3/2/2010	Jim L	1	Jim M	Run independent test on thm_load_esa_packet. Awaiting Jim McFadden to send code of separate routine.	
3090	Then one needs to correct the particle distributions to be introduced in the same orientation. I.e., should use the corrected spinphase upon being introduced (on the fly). This means the particle loading software needs to read the above difference between corrected and uncorrected spinphase, and apply a rotation to the distribution functions upon reading. This should be done with a keyword first, and routinely when we get into orbit (by which time the shadow spinphase determinations will hopefully be automated). I think McFadden is the one to do this but he can also assign it.	2/22/2010	Vassilis	1	Jim McFadden	3089 is prerequisite - Vassilis 4/23: un-rotate the V's from the dphi and the onboard spinphase) and compare with the ground-processed V from the distribution functions. ESA and MOM code to use new features of spin model. In progress and being done in conjunction with 3099f. Jim Lewis needs to review spinmodel2 and thm_load_esa_packet to see how to incorporate spin model correctly.	
3051	EFW spike removal	2/1/2010	Vassilis	1	Jim M	Jim can't reproduce the crash that was reported. Vassilis says there is new code coming from LASP that should work better, V will send us the updated code when it's ready to be merged into our repository.	
3041	Update overview plots to handle survey FFTs? Task modified as follow as of 8/30/2010: One overview plot for the three inner probes - 4 products (FBK-2,FFF-2) and one plot for the outer two probes (4 products for each).			1	Jim M	10-1-10 Vassilis sent plots to confirm	
2103	EAC offsets	8/1/2009	John Bonnell	1	Jim M	John sent Jim M code from Chris Cully showing how the offset should be calculated (8/12) 8-20-10 Jim M send John B for review a database of offsets. 9-2-10: John B to have feedback by 9-11.	
2228	one outstanding issue with THM_LOAD/THM_CAL_EFI is that for some reason when I ask for the calibrated data in SPG (which should just be adjustment of gains and offsets, and conversion from ADC units to physical units, the code is trying to do some despin operations. Since this has direct impact on my ability to evaluate the EFI data quality,	9/3/2009	John Bonnell	1	Jim M	Jim M to create an option in thm_cal_efi.pro so that data in physical units can be gotten out before any spin dependent offsets are applied.8-20-10 Jim M committed changes and will send John B an email to review. 9-2-10: John B to have feedback by 9-11.	
2216	Fix the sign reversal of e34.	8/13/2009	John Bonnell	1	Jim M	John sent Jim M a date/probe combination that Forrest Mozer used to establish the correct sign of e34 (8/12). Jim M will make the appropriate thm_spinfit corrections. testing in progress. John to review once testing is completed.	
4137	What I'm imagining would be a crib that loads the RAW TM data, then the NO_EDC_OFFSET data, then the fully-calibrated data so one can see the various stages in the calibration process directly. If you have time in your schedule to start developing something like that, that would be a natural next step for this part of the effort, and it would mean one more step forward.	9/13/2010	John Bonnell	1	Jim M	sent to John B and waiting for feedback	
2225	L2 EFI cdf (quality flags)	8/31/2004	John Bonnell	1	Jim M	Quality flags and L2 cdf will be addresses when we have a clue about offsets, spinfits, etc	
4123	Remove IDL Save Sets (e.g. MOM), thm_cal_hsk. Also create read-me files for SPDF.	9/2/2010	David	1	Jim M	send Tami email that files are online	
3064	47. CL specplot -- missing peib data for tests 25 and 26	1/15/2010	Jim M	1	Jim M	Data exists, but isn't plotted for some reason	
3085	138. GUI SCM cotrans -- inconsistent results depending on starting/ending coordinate systems. Pass warning through to GUI	2/18/2010	Jim M	1	Jim M	Also should check if same problem exists with command line? Will take time to look at code to get an estimate	
4086	Requested better instructions on how to use TDAS with other IDL libraries	6/30/2010	Strangeway	1	Jim M	(e.g. FAST, Cluster, etc). -- update documentation, suggest workarounds for specific situations (e.g. conflicts with TDAS and FAST versions of tplot)	tbd
4087	Suggested that we bundle quickstart document in TDAS zip	6/30/2010	Strangeway	1	Jim M	Talk to David - thought we had one	1 week
4056	EFI Calibration Document	4/30/2010	David	3	Jim M		
2288	had expected that this cotrans would occur at the very end, after all the calibration code. But the calibration itself seems to be affected, as reflected in the following differences between the log messages before/after rev 6929:	11/12/2009	Jim	3	Jim M	see 2256	
2283	There is another aspect to this problem. Dead-time corrections are severe for ion ESA SW data and there are no dead-time corrections for onboard moments. Some algorithm will have to be developed that does this correction after the fact. Davin developed an algorithm like this for Wind 3DP. That algorithm may not work directly due to differences in energy sweeps, but something like it could be developed for THEMIS. Davin and I can provide some advice and direction. Similarly electron onboard moments in the SW may also need some corrections -- this should also be worked out at the same time.	11/2/2009	Jim Mcfadden	3	Jim M		
2058	found 3 errors in the new th*_l2_esa masters - the good news is, with them		Vassilis	3	Jim M

4104	8/30/2010 Pat forwarded email from Igor to Davin. Davin thinks it may have to do with attenuator status flag. Will check onboard versus ground moments.	4/19/2010	Igor Kirpichev	0	Pat	Vassilis wants to talk to Davin.8/30/2010 Pat forwarded email from Igor to Davin. 9/13/10: Pat will check if task 4030 is causing this problem and then David will email Igor. 9/20/2010 Pat will talk to Davin;10/7: almost done
4139	thm_part_getspec bug	9/14/2010	Pat	0	Pat	Send out email to folks. Who?
4151	Move THEMIS EPO gmag jobs to AUX0	10/8/2010	David	0	Pat	
4141	add interpolation internally to the calc routine	9/16/2010	Vassilis	1	Pat	
4138	Install the new GEANT model when released. 4.9.4 is currently in beta.	9/14/2010	Davin	1	Pat	1-2 hrs
4134	I noticed some discrepancies in the SST attenuator calibrations for the on-board moments and the ground-computed moments. The on-board moments use a scaling factor of 1./128. and they use a 4-bit check to determine if the attenuator is open or closed. The ground-computed moments use a scaling factor of 1./64. and but they only check the least significant digit of the 4-bit attenuator flags to determine if the attenuator is opened or closed. I asked Davin and said I should change the code such that both use a scaling factor of 1./64. and both use the 4-bit check. This is a fairly simple change, but it does change how the attenuator is handled significantly.	9/10/2010	Pat	1	Pat	
4152	verify the location of the sun-contaminated bins for each spacecraft and any change in location over time(they should change very slowly if at all). They would then re-activate the sun contamination masking. It was previously disabled because the masking was originally in the from place. Davin said that he wants to create the new configuration files that would be uploaded to the spacecraft.	10/8/2010	Vassilis and Davin	1	Pat	
3055	SST calibrations	12/18/2009	Davin	1	Pat	
3055c	Extend thm_pdist to populate all dist struct fields(mass etc...) so that moments can be correctly generated	7/1/2010	Davin	1	Pat	Davin to Review 3055c - 3055j and see if further changes needed - eta 8/16
3055d	3055d1 Energy Scales. Scales for scaled raw energy boundaries. There will be 4 parameters. One for each sensor head. 3055d2 Energy Offsets. Offsets for scaled raw energy boundaries. There will be 4 parameters. One for each sensor head. 3055d3 Geometric factors. Scaling factors for raw fluxes. There will be 4 parameters. One for each sensor head. 3055d4 Efficiencies. Scaling factors for raw fluxes. There will be 16x4 parameters. One for each combination of energy bin/sensor head.	7/1/2010	Davin	1	Pat	
3055e	Provide initial calibration file which contains calibration parameters that were previously hard-coded. This will serve as a template for future modifications.	7/1/2010	Davin	1	Pat	
3055e	In first version, I had split time in calibration file; used separate column for year month date hour minute second, Davin asked that it be stored as one column. This is already done.	7/12/2010	Davin	1	Pat	
3055f	The calibration file should include an additional factor: the nominal g-factor. The other 4 g-factor parameters will be corrections applied to the new factor.	7/12/2010	Davin	1	Pat	
3055g	include 4 new parameters for the sst attenuator calibration	7/12/2010	Davin	1	Pat	
3055h	Need to include new parameters for dead time corrections. I need to review code to determine appropriate number of parameters and verify with davin.	7/12/2010	Davin	1	Pat	
3055i	Need to version calibration files. Looking at FGM for version control	7/12/2010	Davin	1	Pat	
3055j	.Right now, the calibration files are one line only. timestamps are included in the files, but they are not yet used by calibration code. add support for time varying parameters.	7/14/2010	Davin	1	Pat	
3055k	Davin delivers SST calibration parameters	7/19/2010	Davin	1	Davin	
3055l	Install SST calibration parameters	7/19/2010	Davin	1	Pat	dependent on 3055k

4072	Put eclipse spin model correction code in SST as already has been done for esa packet.pgm	6/8/2010	Jim M	1	Jim M	wait for SST calibrations	
4068	Lynn Wilson possible enhancements	6/1/2010	Lynn Wilson	1	Pat	Review Lynn's software and generate list of features	
3048a	Profiled EFI calibration can speed up by reducing the number of calls to spinmodel_interp_t. Right now >95% of time is spent in spinmodel. It calls spinmodel_interp_1_2x for each 3d data type, could probably use a single call for multiple data types with the same cadence.	1/25/2010	Pat	1	Pat		
4083	GOES plots on the web	6/28/2010	Vassilis	1.5	Pat	Vassilis wants overview plots for GOES, Jim M to write the code and generate GOES overview plots for the data we have so far. Not a daily process, because we only get binary GOES data in occasional batch updates from Howard Singer	
4129	We would like to incorporate the Hermanus gmag data into the THEMIS database in some form of external ground station, like the Greenland	9/8/2010	Vassilis	2	Pat		
4002	Document: SST File and Calibration Processing	3/5/2010	David	2	Pat		
4119a	Reorganize sun contamination keywords. (Add 'manual' option to method_sunpulse_clean)	8/26/2010	Vassilis	2	Pat		
4119b	Add 'automatic' option to method_sunpulse_clean which will sum across time range provided by user in new keyword.	8/26/2010	Vassilis	2	Pat		
4119c	Create a new crib that shows only a few simplified options to the users. (all_angle_median, scale_sphere, manual bin selection (for fill), automatic bin selection)	8/26/2010	Vassilis	2	Pat	4119a and b prereq's	1-2 hrs
4012	When Cindy & I tried to load tha_eff on 2007-03-23, it didn't load and said some calibration quantity couldn't be found. When I tried to load the same thing, I didn't have a problem. So the trick would be to find out what changed from my computer to Cindy's computer and to figure out how often our user's computers are going to have the same problem that Cindy's computer had.	3/22/2010	Pat	2	Pat	Jim M: I have no trouble with EFF data either for linux or windows.	4-6 hrs
2187	I noticed a bug in the x-axis options panel. It probably also applies to the y-axis options. If the set-all button is selected on the grid tab, then changing panels doesn't update the settings on the grid tab to the settings currently displayed for that panel.	7/29/2009	Pat	2	Pat	set to most recent user action for all routines	2-4 hrs
2041	thm_load_state out_coord velocity calculations wrong		Vassilis	2	Pat		
2285	Christine brought to my attention a bug that occurs if you use the TDAS tsyganenko routines in a way that is not really something that I expected, but seems to be a legitimate use of the routines. If passing in a set of input parameters that are stored in tplot variables but are not in time-series, the routine produces incorrect results.	11/4/2009	Christine	2	Pat		
4045	For the beta and official sites we want to add a button at the bottom to the right of the existing two buttons. Official site web page url: http://themis.ssl.berkeley.edu/summary.shtml?autoload=1 Please center the 3 buttons. The new button will have the words "Plot Descriptions" and if clicked will link to the following: ftp://apollo.ssl.berkeley.edu/pub/THEMIS/3_Ground_Systems/3.2_Science_Operations/Science_Operations_Documents/THEMIS_Summary_Plot_Description_Tables	4/19/2010	Pat	2	Pat		
2062	Alberta - At the moment the data files are from Dawson (daws), Churchill (fchu), Island Lake (isll) and Fort McMurray (mcmu). I will add Rabbit Lake and Taloyoak at some time but we have some issues with mag pointing at those 2 sites. If you recall, the agreement between Ian and Vassilis was that this data wouldn't be copied to become part of a mirrored archive like the existing data we provide. Instead, each file would be obtained from this site each time it is requested (using curl or some such). This means we can use our own logs to monitor data usage. Themis Software to be able to retrieve from Alberta		Vassilis	3	Pat		
4120	Add title support to plotxy	8/27/2010	Christine	3	Pat		
4121	Add multi-row/column span to plotxy	8/27/2010	Christine	3	Pat		
2090	that streamlines the generation of gmag stackplots and a crib to show how to do this. (< than a day)		Vassilis	3	Jim M		2 hrs
3053	102. Tplot_gui -- overwrite warning when importing data, even if variable gets renamed.	2/3/2010	Pat	3	Pat		6 hrs
2115	tplot does not fail gracefully after illegal margin set. In this case: tplot_options,'xmargin',[100,100], tplot does not fail gracefully after illegal margin set. In this case: tplot_options,'xmargin',[-1,-1] -tplot does not fail gracefully after illegal margin set. In this case: tplot_options,'ymargin',[100,100]			3	Pat		
2267	if you want to load a template, you need to pass the template path in via a keyword, or select an option to open it from the THEMIS->File Menu. I think we should consider adding the template path to the configuration file that we save, so that it can be loaded automatically.	10/19/2009	Pat	3	Pat		
4013	Plot Description Doc Button	3/22/2010	David	3	Pat		
2176	I ran into a small annoyance today when loading a themis document. I had originally loaded ESA and SST data for one time period, then overwrote that data by loading the same quantities but for a different time period. I did this several times and then saved the document for later. When re-opening the document I got a series of prompts asking whether I would like to re-write each quantity. It would speed up and streamline the process in this case if data that was later overwritten is not loaded when you open the document.	7/20/2009	Aaron	3	Pat	I spoke to Pat about this yesterday and we both agreed that while we cannot be sure which quantities should be re-loaded and which shouldn't (some may have been used temporarily for calculations). However, we can store the users's original choice to overwrite the data or not. So while we may not be able to save on loading time we can still keep the user from having to click multiple messages and from having to remember what they chose originally. The latter is particularly important since they may receive	16
2201	One feature that was never implemented for the mini-language is globbing. (The ability to use "*" and "?" to reference multiple tplot variables at once.) This is a feature that is standard with many of our other tplot data processing routines. I think it would be very useful to include in the mini-language.	8/5/2009	Pat	3	Pat		40
3086	add MACCS gmag data from 2007 to our data archive. We already have MACCS data for some years and a process that automatically downloads it/converts to CDF. So the task would involve finding missing files from 2007 and feeding them into our pre-existing processing framework. It should be pretty straightforward, but probably non-trivial because of learning curve/unexpected details.	2/19/2010	James Weygand	3	Pat		

3091	Add a configuration setting "force_download", which if enabled, will download data even if the remote file is older than the local file. This comes up if you're switching back and forth between using QA data and production data; once you've downloaded QA data, it's hard to download (usually older) production data without manually removing any QA files. This should apply to all data sources -- THEMIS, GOES, WIND, etc.	2/22/2010	Vassilis	3	Pat		
3065	68. GUI z-axis options -- when Fixed Min/Max selected, value in spinners does not reflect current range as it does for X and Y axes. Displayed range when spinners desensitized is inaccurate.	2/10/2010	Aaron	4	Pat	check draw object	
4005	The TDAS Software will be enhanced to incorporate data from the STEREO mission.	3/8/2010	David	4	Pat		8 hrs
4006	add the following ancillary ground-based observations: MAGDAS Network, Auroral Electrojets (AE) and Ground Radars (SuperDarn, AMISR and Sondrestrom)	3/8/2010	David	4	Pat		4 hrs
3007	EPO-GMAG msgs: modify the script and only issue this message if > 2 days	12/8/2009	David	4	Pat		
2279	How's it going with the stats? I noticed the query takes some time because it's looking at the whole table. It could be refined for specific time periods. The delay in return could be what's causing Dave to have access problem - or the SSL firewall?	10/23/2009	Tim	4	Pat	see 2277	
2135	I didn't realize the cotrans messed up the velocities for earth centered coordinates. Maybe what we really need to do is modify cotrans so that it correctly transforms velocities. Users can incorrectly transform velocities just as easily using thm_cotrans on the command line, as they can using the coord keyword.		Pat/Jim L	4	Pat		
2124	I loaded a plot which had the line color as white. Because the legend plots in the same color as the line, the legend text did not show up. We should probably just put in a check for this case. If the line is white and the background is white then draw the text in black		Pat	4	Pat		
2063	Problem with edit3dbins is being caused by IDL's mouse system variable not being updated correctly on Macs. The ctime procedure, used to interactively select a time from a tplot window, relies on this variable to determine when a selection has been made in the tplot window. If the variable is never updated then ctime gets caught in an infinite loop. It's unclear whether this is specific to a particular OS version, but the routine should probably be modified at some point to maximize compatibility with Macs. In the meantime the alternate method of calling gettime that I copied you on yesterday should provide a temporary way around this bug.		Aaron	4	Pat	verify note in quick reference guide and then task will be closed	
2106	Add the ability to right-click on a variable in the widget-tree and display a popup with basic information about the quantity such as dimensions, range or other meta data as well as the ability to rename variable		Pat	4	Pat	originally part of task 64, however, after further evaluation it was determined this best belonged with the widget tree rather than the analysis window	
2220	I found a small bug in the z-axis panel in the gui. If I change the z-axis annotation size of a layout with 2-panels each with one spectrogram, when I apply this change, it gets applied to both panels, even if set-all is off.	8/27/2009	Pat	4	Pat		
3063	40. CL tplot options -- setposition test plots all look the same	1/15/2010	Pat	4	Pat	Long-standing tplot bug, may not ever be fixed	
4029	One of Michael Hartinger (a grad student in atmos) is having trouble with thm_part_getspec when the SST is in fast survey mode. The routine can take a very long time to run because of the higher resolution. I think we should put a feature request on the list to automatically downsample the particle data in time. Normally, I would suggest that uses downsample using one of our interpolation routines, but because the particle data is stored in a special common block, there is no easy way for end users to perform this operation.	4/6/2010	Michael Hartinger / Pat	4	Pat	Michael supplied code for thm_part_moments	4-8 hrs
	Misc						
447	Save THEMIS document: Attempting to save to a read only file in			1		IDL Error report to ITT
